D.O.No. Secy(HFW)/IMP/Circular/2020

Dated : 6 February, 2020

Dear Amrit, Secy, Health & Edu
Secy, (H) Education

You may be aware of the Novel Coronavirus reported from China and other countries, 3 travel related case in India. Though much is not known about the disease dynamics, it is evident that there is human to human transmission. As of now, there is no drug or vaccine available to manage this disease. Hence preventive measures become crucial to stop spread of this disease.

Creating awareness among university/college students about preventive interventions such as frequent hand wash, respiratory etiquettes (using handkerchief over mouth while coughing/ sneezing, use of tissue paper or using the sleeve of shirt covering upper arm, staying away from college when sick, avoiding public gatherings etc) will help in preventing/ reducing transmission of not only this disease, but also large number of other communicable diseases, notably flu like illnesses. Further, such informed youth can be agents of change for their family, community and beyond.

In view of the above, you are requested to take up with State Education Departments, central universities and other autonomous teaching institutions under your ministry to sensitize their students these simple public health measures that will go a long way in preventing spread of Novel Coronavirus disease. An information pamphlet is enclosed which would come handy for the teachers to sensitize the students.

Yours sincerely
P. Sudan
(Preeti Sudan)
