**Proposal from CSE: Promotion of environmental awareness among college students**

Respected Ma'am,

Warm Greetings from Centre for Science and Environment (CSE) New Delhi.

To give you a brief background, Centre for Science & Environment (CSE) is an Environment Research Organization based in Delhi, chaired by eminent agricultural scientist Dr. M. S. Swaminathan, and headed by Ms. Sunita Narain, one of India's leading environmentalists. CSE's organizational culture is built around an information-knowledge-wisdom chain that creates awareness among people about the emerging problems and helps in building constituencies for reform within the society. Though our primary activity is research based, we make all efforts to spread the message through our publications and fortnightly magazine, "Down To Earth".

Higher Educational Institutions are one of the major grounds for conducting this important initiative. Environmental education based on life experiences should begin during the very earliest years of life. Such experiences play a critical role in shaping lifelong attitudes, values, and patterns of behavior towards natural environments. When more and more students with strong environmental responsibilities and missions step out of the colleges and join areas of national development, especially when they are in decision-making positions, they will bring hope to India's sustainable development.

We have some interesting publications on environmental science particularly on Climate Change. These educational resources break down the science, impacts, politics and sustainable pathways from innumerable scientific studies and reports using infographics, case studies and lectures. This resources have been specially written keeping in mind the UGC syllabus and will enable professors and students gain a deeper understanding of the most burning issues of our lives. "Down To Earth" magazine provides continuous information about relevant environment issues, from around the country.

1. Climate Change Reader for Universities : 130 Pages : Rs. 290.00
2. Environmental Reader for Universities: 188 Pages: Rs. 290.00
3. Down To Earth Environmental fortnightly magazine: Annual subscription charges (24 issues) : Rs. 1400.00
